Pan American World Airways, one of the greatest pioneering aviation entities of all time, built its business on the backbone of its South American Routes.

We retrace the route of the famous flights, PA200/201, more commonly known as the East Coast Flyer. Join us and a Pan Am Expert on this exciting re-creation.

The name Pan Am has always been tied to Latin America and the route network covered most of Central and South America by the mid 1930's. Known as a "Signature Service" Pan Am Flight PA201 was operating in 1939 six days per week using the Sikorsky S-42 flying boat and took a grand total of six days to reach Buenos Aires from the Pan Am Terminal in Miami.

The flight was later extended to include New York and existed until the airline ceased business. InterContinental Hotels, founded by Pan Am, built its first hotel in Belem, Brazil.

We visit many of the original ports-of-call of the Pan Am flying boats and stay in many of the original hotels used to accommodate Pan Am passengers and crew along the route.

Day Six

Today we introduce our “Personalize Your Day” programme. We realize that all guests are not the same and we all have different interests. In most destinations, our guests will be able to pre-select their activities for the day. Here in San Juan, we have a great selection of tours and activities to appeal to all tastes.

The water's off Puerto Rico offer some of the best sea life in the Caribbean. Culebra is a small, sparsely populated island and surrounding group of cays off the east coast of Puerto Rico. In the northwest, Flamenco Beach is a long crescent of white sand and turquoise water backed by tree-covered hills. Nearby Tamarindo Beach offers clear waters full of fish, sea turtles and rays. Enjoy a full day of snorkelling and relaxing on the beaches.

For the more adventurous, we offer a full day to Cueva Ventana. We hike up to the cave where we are met by trained biologists who provide guided tours of the natural cave, which contains insects, snakes, and bats.

We then visit the Arecibo Observatory, a unique facility made world-famous in the James Bond film - Golden Eye. Another interesting excursion is to the El Yunque Rain Forest where we undertake a nature walk with local biologists followed by kayaking at Bioluminescent Bay. Both these activities do require a fairly good level of fitness!

A more leisurely day is spent discovery the Artists and the history of Ponce. A curator from the Museo de Arte de Ponce brings the museums collection to life. The collection is one of the most important collections of European art in the Americas with works ranging from Renaissance to the 19th century with particular strengths in Baroque and Victorian painting.

Where the waters cascade

Day Fourteen

Iguazú Falls or Iguacu Falls are waterfalls of the Iguazu River on the border of the Argentine province of Misiones and the Brazilian state of Paraná. Together, they make up the largest waterfall system in the world. The falls divide the river into the upper and lower Iguazu.
